EDUCATION

Kadi University

Bachelor of Computer Applications

June 2023

Gandhinagar, India

Kadi University

Master of Computer Applications

March 2025

Gandhinagar, India

EXPERIENCE

Cognifyz Technologies

October 2024 - December 2024

Internship (Data Analyst)

- Proficient in Python, SQL, and data visualization tools such as Tableau and Power BI to extract and present actionable insights.
- Strong analytical and problem-solving skills, complemented by excellent communication and attention to detail.
- Demonstrated ability to interpret complex datasets, deliver data-driven recommendations, and collaborate effectively in team settings.
- Enthusiastic about continuous learning and applying innovative data analysis techniques to solve business challenges

The Data Sequence

December 2024 - Present

Internship (Python&UI/UX developer)

- Developed backend features and RESTful APIs using Python and Flask. Designed and optimized RESTful APIs to ensure seamless communication between front-end and back-end systems.
- Designed responsive UI/UX for 1920 Tattoz Hub, a school website, and a car rental app using Figma. Collaborated with cross-functional teams to gather requirements and implement new features.
- Created wireframes, user flows, and interactive prototypes following user-centered design principles.
- Improved application performance and optimized design for mobile-first and accessibility.
- Collaborated in an agile team, conducted usability testing, and implemented design improvements.

SKILLS

- **UI/UX Tools:** Figma, Adobe XD, Illustrator, Jira
- **Prototyping:** Wireframing, User Flows, Interactive Prototypes
- **Design Concepts:** Design Thinking, User Research, Usability Testing
- **Frontend:** HTML, CSS, Bootstrap
- **Others:** Python, Flask, API Integration, Power BI, Tableau

PROJECTS

• Car rental application

- Technologies: Flutter, Python Flask, MongoDB
- Designed mobile UI screens and dashboard using Figma with a focus on user-centered design.
- Created wireframes, prototypes, and user flows to optimize booking and role-switching experience.
- Applied visual hierarchy, consistent color schemes, and responsive layouts for better usability.
- Conducted usability testing and improved navigation and interaction based on feedback.
- Collaborated with developers to ensure pixel-perfect implementation in Flutter.
- Enhanced user engagement through clean design, real-time booking updates, and intuitive flows.

• 1920 Tattoz Hub & School Website (UI/UX Design)

- Tools: Figma, Illustrator
- Designed full website UI in Figma, covering advanced concepts like auto layout, components, variants, prototyping, and design systems..
- Created custom vector illustrations in Adobe Illustrator and integrated them into high-fidelity mockups.
- Created interactive prototypes, user flows, and applied visual hierarchy and layout principles to enhance usability and storytelling.
